

AMENDMENTS TO THE SPECIFICATION

Please add the following new paragraph beginning at page 10, line 3

Also a recording method comprises:

a step of changing a carry command value when carrying a front end region of a recording medium and when carrying a rear end region of the recording medium;

a step of making a carrying mechanism for carrying the recording medium carry the recording medium based on the carry command value that has been changed; and

a step of recording on the recording medium that has been carried.

With this recording method, it is possible to carry especially a front end region and an rear end region of a recording medium with high precision using simple control.
